Rong Fan, Ph.D.

Merced, CA | fanrong1988@gmail.com | linkedin.com/in/rong-fan-ph-d-70540a31

Clinical Pharmacology Director with 9+ years of pharmaceutical industry experience, including 4 years in DMPK and 5 years in clinical pharmacology. Oncology experience spans dose optimization, quantitative analyses, regulatory submissions, and clinical and nonclinical development. Contributed evidence supporting dosing decisions, labeling updates, postmarketing obligations, and a new tablet-strength approval. Provide study-level scientific leadership, modeling oversight, and vendor management across clinical pharmacology, DMPK, and bioanalysis.

PROFESSIONAL EXPERIENCE

Karyopharm Therapeutics Inc.

Director, Clinical Pharmacology — Jul 2025–Present
Associate Director, Clinical Pharmacology — Jan 2023–Jun 2025
Senior Manager, Clinical Pharmacology — Sep 2021–Dec 2022

- Support all Karyopharm oncology assets including selinexor, eltanexor, and KPT-9274 under the department head's strategic guidance and approval, sharing primary responsibility for dedicated studies such as DDI, hepatic impairment, and leading clinical pharmacology workstreams in broader trials, including Phase 3.
- Oversee scientific deliverables, timelines, and quality across clinical pharmacology, pharmacometrics, data compilation, and consulting (>5 vendors); bioanalysis (3 vendors); toxicology consulting (2 vendors); and DMPK (2 vendors). Participate in vendor selection, budget planning, and onsite audits.
- Author and review sNDA sections 2.4, 2.5, 2.7.1, and 2.7.2, information request from regulatory authorities, investigator's brochure (IB) sections covering clinical pharmacology, DMPK, and toxicology; support annual reports and labeling updates.
- Author and review weight-of-evidence assessments for Type D written-response-only interactions; contribute responses to information requests on clinical pharmacology, bioanalytical assays, DMPK, and toxicology.
- Perform gap analyses and develop integrated clinical pharmacology, DMPK, and toxicology plans for company assets; contribute to study design and analysis strategy.
- Perform interim noncompartmental (NCA) and statistical analyses supporting hepatic impairment and DDI studies, coordinate across internal functions and external vendors to ensure smooth sample/data flow and provide input and review the final PK analyses plan/reports and CSR, contributed to label negotiation. The efforts supported selinexor labeling updates and fulfillment of FDA postmarketing requirements (PMRs) and commitments (PMCs).
- Perform and author dose proportionality analysis to support biowaiver submission supporting approval of a new selinexor tablet strength and related labeling changes.
- Contribute to analysis plans for population PK, exposure-response, PK/PD, and QSP analyses — collecting and transferring relevant data, drafting data specifications for popPK-ER analysis, directing external vendors on execution and scientific reviewing results and issuing reports — supporting dose-optimization PMR trials and sNDAs, including myelofibrosis, and phase 3 dose selection.
- Lead bioanalytical and nonclinical ADME studies, including bioanalytical method validation/sample analysis, radiolabeled mass balance, metabolite identification, QWBA, CYP induction/inhibition, and protein binding studies; provide inputs and review bioanalytical method-validation plans and reports and sample-analysis reports, and support pharmacology and toxicology study design and interpretation.
- Lead blinded-study data flow and data-transfer agreements, coordination across internal functions and external vendors; co-author unblinding and sample-disposition SOPs, serve on the Data Governance Steering Committee, and co-mentor summer interns.
- Author peer-reviewed manuscripts and abstracts presented at scientific meetings.

Frontage Laboratories Inc.

Senior Scientist II, DMPK — Jan 2020–Sep 2021
Senior Scientist I, DMPK — Jan 2019–Jan 2020
Scientist I, DMPK — Jan 2017–Jan 2019

- **Study execution:** Designed protocols and executed, managed, and troubleshot regulated and non-regulated in vitro/in vivo DMPK studies using radiolabeled and non-radiolabeled compounds.
- **DMPK studies:** PK, mass-balance, metabolite identification, tissue-distribution, protein-binding, and metabolite-isolation methods with radio labeled and no radiolabeled small molecules and peptides.
- **Regulatory reporting:** Reviewed study data and authored reports supporting FDA and EPA submissions; collaborated with Quality Assurance on EPA GLP and regulated clinical-sample studies.
- **Client communication:** Addressed scientific questions and explained study findings and data packages.
- **Mentoring:** Trained and mentored junior scientists in the DMPK group.

AWARDS

Karyopharm iCARE Award, Alignment & Accountability, 2023
Frontage Award, 2018
The Rho Chi Society Award, Temple University, 2016
Temple University Fellowship, Temple University, 2014

EDUCATION

Temple University, School of Pharmacy — 2011-2016
Ph.D. in Pharmaceutical Sciences
Shenyang Pharmaceutical University — 2006-2011
B.Sc. in Pharmacy

Certifications

- Population PK/PD Pharmacometrician (Phoenix NLME), Level 1 — Certara (2023);
- NCA Analyst (Phoenix WinNonlin) — Certara (2022).
- Principals of Clinical Pharmacology - NIH (2022)
- Regulatory Affairs Certificate: Pharmaceuticals — RAPS (2016).

Selected training

- Biostatistics in Public Health — Johns Hopkins University (2026).
- GastroPlus (2026) and MonolixSuite Pharmacometrics (2023) — Simulations Plus.
- PK/PD Modeling and Population PK Data Analysis — University at Buffalo (2023).
- QSP Workshop — ACCP (2022); Principles of Clinical Pharmacology — NIH (2022).

TECHNICAL SKILLS

Clinical pharmacology: NCA, dose proportionality, population PK/exposure-response/PK-PD analysis oversight, and regulatory writing.

DMPK and bioanalysis: ADME, radiolabeled studies, metabolite identification and isolation, bioanalytical review, HPLC/UHPLC, mass spectrometry, and radiometric analysis.

Software: Phoenix WinNonlin/NLME, NONMEM, MonolixSuite, Pumas/Pumas CP/PumasAide, R, SAS, MATLAB, and Starting Point.
